Non-GAAP Supplemental Financial Measures

Funds from Operations (FFO)

FFO is a widely recognized measure of REIT performance. The Company computes FFO in accordance with standards established by the National Association of Real Estate Investment Trusts, or NAREIT, which may not be comparable to FFO reported by other REITs that do not compute FFO in accordance with the NAREIT definition, or that interpret the NAREIT definition differently than the Company does. The revised White Paper on FFO approved by the Board of Governors of NAREIT in April 2002, and subsequently amended, defines FFO as net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from debt restructuring, sales of properties and real estate related impairment charges, plus real estate related depreciation and amortization and after adjustments for unconsolidated partnerships and joint ventures. The Company presents FFO because it considers it an important supplemental measure of the Company's operating performance and believes that it is frequently used by securities

analysts, investors and other interested parties in the evaluation of REITs, particularly those that own and operate commercial office properties. The Company also uses FFO as one of several criteria to determine performance-based bonuses for members of its senior management. FFO is intended to exclude GAAP historical cost depreciation and amortization of real estate and related assets, which assumes that the value of real estate assets diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions. Because FFO excludes depreciation and amortization unique to real estate, gains and losses from property dispositions and extraordinary items, it provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates, operating costs, interest costs, providing perspective not immediately apparent from net income. FFO does not represent cash generated from operating activities in accordance with GAAP and should not be considered as an alternative to net income (determined in accordance with GAAP), as an indication of the Company's financial performance or to cash flow from operating activities (determined in accordance with GAAP) as a measure of the Company's liquidity, nor is it indicative of funds available to fund the Company's cash needs, including its ability to make cash distributions.

Funds Available for Distribution (FAD)

FAD is a non-GAAP financial measure that is not intended to represent cash flow for the period and is not indicative of cash flow provided by operating activities as determined in accordance with GAAP. FAD is presented solely as a supplemental disclosure with respect to liquidity because the Company believes it provides useful information regarding the Company's ability to fund its dividends. Because all companies do not calculate FAD the same way, the presentation of FAD may not be comparable to similarly titled measures of other companies. FAD does not represent cash flow from operating, investing and finance activities in accordance with GAAP and should not be considered as an alternative to net income (determined in accordance with GAAP), as an indication of the Company's financial performance, as an alternative to net cash flows from operating activities (determined in accordance with GAAP), or as a measure of the Company's liquidity.

Same-Store Net Operating Income, Same-Store Cash Net Operating Income and Related Measures

The Company presents same-store net operating income, same-store cash net operating income, same-store joint venture net operating income, and same-store joint venture cash net operating income because the Company believes that these measures provide investors with useful information regarding the operating performance of properties that are comparable for the periods presented. For properties owned since January 1, 2012 and still owned in the same manner at the end of the current quarter, the Company determines same-store net operating income by subtracting same-store property operating expenses and

ground rent from same-store recurring rental and tenant reimbursement revenues. Same-store cash net operating income is derived by deducting same-store straight line and free rent from, and adding same-store tenant credit loss allowance to, same-store net operating income. Same-store joint venture net operating income and same-store joint venture cash net operating income are calculated in the same manner as noted above, but includes just the Company's pro-rata share of the joint venture net operating income. None of these measures is an alternative to net income (determined in accordance with GAAP) and same-store performance should not be considered an alternative to GAAP net income performance.

Certain Supplemental United States Federal Income Tax Consequences

The following discussion supplements the discussion under the heading “Material United States Federal Income Tax Consequences” in the prospectus, dated as of December 21, 2012, that forms a part of the Company’s Registration Statement on Form S-3ASR (File No. 333-185626).

New U.S. federal income tax rates went into effect on January 1, 2013 pursuant to the American Taxpayer Relief Act of 2012. For taxable years beginning on or after January 1, 2013, the maximum tax rate on capital gains of non-corporate taxpayers and qualifying dividends is 20% and the highest marginal tax rate on ordinary income of individuals is 39.6%.

The Foreign Account Tax Compliance Act, which is referred to herein as FATCA, is contained in Sections 1471 through 1474 of the Internal Revenue Code of 1986, as amended, and was originally enacted in 2010. Based on recent Internal Revenue Service guidance, the FATCA rules may impose a U.S. federal withholding tax of 30% on (i) interest, dividends, and certain other withholdable payments from U.S. sources made after June 30, 2014, and (ii) the gross proceeds from the disposition of any property of the type that can produce interest or dividends from U.S. sources occurring after December 31, 2016. FATCA withholding would generally apply to the payments or proceeds paid to certain non-U.S. entities (including, in some circumstances, where such an entity is receiving payment as an intermediary) that fail to comply with certain certification and information reporting requirements. As revised by recent Internal Revenue Service guidance, FATCA withholding will only apply to debt obligations issued after July 1, 2014, unless a debt obligation issued on or before July 1, 2014 is significantly modified and deemed reissued for U.S. federal income tax purposes after July 1, 2014. Prospective investors should consult their own tax advisors regarding the effect, if any, of the FATCA rules for them based on their particular circumstances.
